# VMX-agility™

Agile soft starters

## Soft Stopping

Current is limited during soft stopping and gives greater control against water hammer.

## Fire Mode

External input signal overriding normal controls allowing the motor to continue running in emergency situations.

life event logging  
with real-time  
clock

6

menu

600 V  
max. operating  
voltage

## Automatic Reset

Automatically resets trips in defined situations. Reduces the requirement to send a service technician to reset nuisance trips.

> VMX-agility™ has been developed to exceed the exacting demands of industrial automation motor control clients. VMX-agility™ delivers stable, structured start and stop ramps for smooth, efficient performance. Three standard frame sizes cover all typical applications from 7.5kW to 250kW at 500VAC, 15 - 350HP at 600VAC.

## i23 smart application pre-program suite

Optimise VMX-agility™ for your specific application at the touch of a button. Select any of the 23 pre-programmed setup profiles and you are up and running in under 1 minute.

## 3S Technology

Automatic ramp control profiles ensure smooth start and stop performance, delivering stable acceleration and deceleration in all operating conditions.

- 1 OLED display**  
Full text messages enabling fast programming and rapid fault finding with no codes and real-time value monitoring. Local display of recent logged events.
- 2 USB**  
for field firmware upgrades and downloading of the event logging data.
- 3 Modbus RTU**  
communications as standard. No need for optional communication cards.

### Frequent Number of Starts

Optional cooling fan for frequent duty applications with up to 40 starts per hour - size 1, and from 10 to 40 starts per hour (rating dependent) - size 2.

### Full I<sup>2</sup>t

motor overload protection with 'thermal memory' feature

### Optional Remote Display Keypad

Plug in remote mounting unit keypad mimics the VMX-agility™ display and keypad function.

Control of single or three phase motors

### Optional Power Supply Unit Module

Unique to VMX-agility™ this module enables control voltage options in one standard product unit, no need to purchase separate soft starters for different control voltages.

### Motor Overload Protection

Protecting the motor and soft starter in the event of an overload situation at full I<sup>2</sup>t motor overload with intelligent thermal memory retention feature. Continually monitoring overloads to ascertain the reduction in overload levels even when VMX-agility™ is in the 'off' state. This is combined with protection and diagnostics giving the operator peace of mind during the motor running phase.

### Life Event Logging

VMX-agility™ life event logging is a unique feature that records the last 1600 events to enable fast accurate fault analysis and their resolution. Recording multiple activities including start, stop, top of ramp, faults, application parameters (time, overload level, currents, frequency) and the device information. The data is collated in StarterView programme and provides the operator with the advantage to undertake a detailed analysis of performance and equipment conditioning in an active predictive and preventative maintenance strategy to avoid unwanted breakdowns and any costly downtime.

### Loss Reduction

An integral bypass is initiated at the top of ramp and reduces losses in the soft starter.

### Start Delay Feature

Intentional start delay allowing pump actuators to engage before start.

### Single & Three Phase Motors

VMX-agility™ Soft Starters may be used with Three Phase and Single Phase motors - adjustment via keypad.

### Control Circuit

A standard 24 VDC control voltage supply with an optional power module which adapts the digital input voltage to accept a 110-230 VAC signal.

### Lowest Panel Production Costs

Three unit frame sizes across the voltage range of 200-600VAC with vertical or horizontal mounting to facilitate efficient panel layout and interconnections to reduce material and panel production time

## Optimised application setup

A suite of pre-programmed application 'complete setup' profiles facilitate a quick and comprehensive commission process to give freedom and independence to engineers. Typical VMX-agility™ setup takes less than 1 minute whereas a comparable competitive product commission could be 60 to 120 minutes for only a partial setup. Access to an advanced setup menu is provided as standard for special application requirements.

### Dimensions - Size 1

#### VMX-AGY-101 to VMX-AGY-113

Weight = 1.97 kg (4.34 lbs)

### Dimensions - Size 2

#### VMX-AGY-201 to VMX-AGY-209

Weight = VMX-AGY-201-207 = 6 kg (13.2 lbs)  
VMX-AGY-209 = 6.3 kg (13.9 lbs)

## Specification

Operational Voltage	200-600 VAC
Rated Frequency	50-60 Hz ± 5 Hz
Index Rating	Trip Class 10: 3.5-17: 90-5 (Trip Class 20 & 30 available)
Starts per Hour	Standard VMX-AGY-101 to VMX-AGY-209 - 5 starts/stops per hour VMX-AGY-301 to VMX-AGY-305 - 3 starts/stops per hour With Optional Fan VMX-AGY-101 to VMX-AGY-203 - 40 starts/stops per hour VMX-AGY-205 - 30 starts/stops per hour VMX-AGY-207 - 20 starts/stops per hour VMX-AGY-209 - 10 starts/stops per hour
Internally Bypassed	Yes
Screen	OLED
Control Supply	Standard 24 VDC With Optional Power Supply 110 to 230 VAC
Inputs	2 Digital Inputs, Both Programmable
Outputs	2 Digital Outputs, 1 Programmable
Overload	Full I <sup>2</sup> t Motor Overload
Communications	Modbus RTU
Full Logging functionality for use with StarterView	Yes
IP/NEMA rating	Size 1 IP20/NEMA Class 1 with finger guard fitted (VMX-AGY-005) Size 2 IP20/NEMA Class 1 with finger guard fitted (VMX-AGY-009) Size 3 IP00 as standard
Ambient Temperature	-20 °C to 40 °C without de-rating 60 °C with de-rating
Transport and Storage	-25 °C to 60 °C -25 °C to 75 °C (not exceeding 24 hours)
Altitude	1,000 m Above 1,000 m de-rate linearly by 1% of unit FLC per 100 m to a maximum altitude of 2,000 m Above 2,000 m contact Motortronics
Humidity	Max. 85% non-condensing, not exceeding 50% at 40 °C
Standards	CE, UL, RCM
Languages	English, French, German, Spanish, Portuguese, Italian
Warranty	2 Years

### Dimensions - Size 3

#### VMX-AGY-301 to VMX-AGY-305

Weight = 15 kg (33 lbs)

## Model Selection

For standard operating conditions of 40°C and 1000 m above sea level.

See manual for de-rating and other conditions.

### Rated Starting Capability

### Typical Applications

Trip Class 10	Trip Class 20	Trip Class 30
3 × Motor Current – 23 secs 3.5 × Motor Current – 17 secs	4 × Motor Current – 19 secs	4 × Motor Current – 29 secs
